Animals in Europe

Name:

From this lesson I learned that

In Europe the development of plants and animals follows

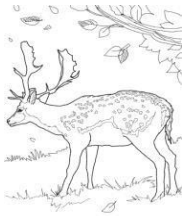

The climate is temperate, there is no

In the Autumn the forest soil is covered with a carpet of dry leaves, acorns, lichens and mushrooms, which serve for

To withstand the cold, some of them and many migratory birds

In the spring life is reviving / waking up / : on the meadows....., the trees.....,

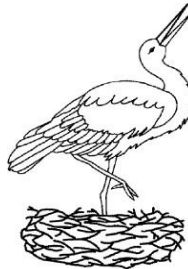

And the animals are going out of
