What Do We Know about The Hedgehogs?

From this lesson I learned that

Hedgehogs like to eat the most.....

Hedgehogs give birth to.....to.....young. They are very tiny, each of them is as big as and weighs only grams.

The little hedgehogs are born completely helpless because

The little ones cannot protect themselves from enemies. That`s why their mother takes care of them by The little hedgehogs suck around

The most dangerous enemies of hedgehogs among birds are
.....

Some other dangerous enemies of hedgehogs are.....
.....

The hedgehogs have got to.....thorns and teeth.

Their closest relatives are.....

Petition / Request

The Little Hedgehog

It`s Hedgehog`s Time! Help! I`m in danger of extinction!

If you see me in your garden, please, put some food there! (raw unsalted meat, minced meat...I like cat pellets, too) ☐ and don`t forget a bowl of water, please!

Don`t pour any milk – I get some stomach problems from it and I can die of dehydration.

But I`m a little bit stupid and if I see milk, I drink it. So, don`t give me any milk!

Do not apply any insecticides and traps! I am harmless and I even help in your garden,

Because I feed on insects that attack your vegetables and crops!

My species is disappearing. Please, help me stay alive!
