

## WHAT DO YOU HAVE TO DO?

Go outside and examine the plants and shrubs you come across.  
Find a plant that attracts bees? Draw this plant in the honeycomb.  
Describe the plant in detail. Write whole sentences.  
Examine the area where the plant is located.  
Why does this plant grow?

What does the plant look like above the ground?

Can you think of three reasons why this plant grows?

Write a detailed description of the plant.

Imagine what the plant looks like below the ground?

Learning goals:

- I am able to detect bee friendly plants and explain why they are bee friendly.
- I am able to examine what the plants need to grow by observing its environment.
- I know the vocabulary to give a detailed description of a plant and its parts.
